Online Dating Tips

On-line [Dating](#) has become the number one business on the internet and it's growing increasingly popular and accepted every day. There are serial daters, tepid daters, repeat daters, and short term daters. Whichever category you fall into, I have to warn you to be careful. You will find a couple of essential things you must know about the on-line dating universe and also the effects it could have in your life. On-line dating can be hazardous to your health.

1) [Dating](#) On-line ruins your personal life. Have you noticed the finer things in life are usually shared with family or close buddies? If you online date, you will have much less time for these same family members and friends, which is unhealthy. These joys, the finer issues, are what make us happy. As you will find only so many hours in a day to see family and friends and experience these healthy joys, the time on-line dating will consume can be damaging. Okay, you would like to attempt online dating, but at what personal cost? Online dating is addictive and simple. Once you begin, you are not going to quit till you discover your "perfect match." Pretty quickly you'll spend a lot of time dating. If this happens you'll

lack "happy connectivity" inside your life, which can lead to many well being issues like depression.

2) Dating On-line can give you an STD (Sexually Transmitted Disease). Those that date on-line meet an abundance of fascinating and appealing individuals. The unfortunate factor is that when two interested people go on a "date" it invariably leads to sex. Whilst sex is great and natural between two human beings who are interested and attracted to one another, on-line dating can open the door to severe problems. Online dating brings the opportunity to close ratio for sex into overdrive. The more sex you have, the more most likely you are to catch a sexually transmitted disease. Be careful! STD's can lead to death if you're not careful. If STD's do not scare you, how about becoming a Sexaholic? Or perhaps, a Sexaholic having a non curable STD? Scary stuff.

3) Dating Online can result in bankruptcy. Plain and easy, dating is truly costly. Sushi restaurants, flowers, Godiva chocolates, fancy clothes, all of these issues are expensive. A decent first date at minimum costs \$30. I know some guys who receive 20 emails each day from interested and attractive ladies. Some women I know obtain close to 200 each day! Lets say my guy friend who gets 20 emails each day decided to go on a date with these 20 interested individuals. He's a gentleman, so he always pays. At \$30 a evening done 20 occasions, his out of pocket cost is \$600. What if he went out with all the women who were interested over the course of just one week? He'd be spending \$4,200 a week!! That's \$16,800 a month, or \$201,600 a year! Yuck! Be careful. Even though he met all these ladies on a free online dating web site, dating is costly and at \$201,600 a year, he'll file for bankruptcy in no time.
