

# **Introduction to top online dating portal AnastasiaDate**

[AnastasiaDate](#) is a well-known online dating portal focusing on introducing single American men to ladies from Ukraine, Russia and other Eastern European countries. The portal was launched in 1993 by a Russian-American couple who met via an international dating agency in 1992 and married that same year.

The company was named after Grand Duchess Anastasia of Russia whom many young Russian women saw as a role model. The website was introduced in 1997 and the mobile application for iTunes and Google Store was launched in 2013.

Even though online dating websites have proven to be very useful, many people are still cautious when it comes to using these types of services. They shouldn't be blamed because many of the international dating sites pose one challenge or the other. Nevertheless, all challenges encountered on other dating websites have been overcome by AnastasiaDate. Below is a list of some of the areas that the company has perfected.

## **Affordable Services**

Signing up with the dating portal is free and newly registered members are not obliged to purchase further services. Looking through the database of single Russian and Ukrainian women is also free of charge as is sending the first letter to any woman. The prices of other exclusive services (Live Chat, CamShare, Date a Lady, etc.) are very reasonable considering the effectiveness, ease and efficiency of the portal and the opportunity to get to know some of the most beautiful women in the world.

The company hosts promotions and games on their portal and Facebook page, giving members the chance to win free credits. There are also regular trial offers for services like LiveChat and CamShare.

## **Thousands of single lady members**

AnastasiaDate boasts a memberbase of more than four million people from over fifty countries in the world. With more than eighty million visitors using the site each year, finding your perfect match shouldn't be too difficult. The database features more than ten thousand profiles of attractive single Ukrainian and Russian women and the numbers keep increasing with every passing day. All female members are genuine and available for live chat, video dates or even personal meetings during Romance Tours.

## **Good Anti-Scam Policy**

AnastasiaDate takes its members' confidentiality and safety very seriously and has employed a top anti-scam system and team. The staff from AnastasiaDate personally verify the identity of a lady before confirming her profile on the site. This is done to ensure that the woman is real and to let her know that she has been added into the database. During verification process, the woman will also confirm her interest in a relationship with one of the male members.

Should you encounter a problem or have suspicions that a particular woman is not honest in her intentions, you can always contact Anastasia's customer support team who will investigate the matter for you.

## **Guaranteed Online Security**

All personal details and profile info are confidential as AnastasiaDate never shares it with a third party individual or company. Checking security measures is a daily process and only the top internet security providers (McAfee, Verisign, etc.) are used. All transactions, messages and contacts are therefore safe.

## **Professional services**

Anastasia Date is a very reliable and popular brand known all over the world to provide the best dating services. The team responsible for technical, translating, marketing, etc. services consists of more than two hundred professionals. Some of the popular services offered by AnastasiaDate include Date a Lady, Video Date, Live Chat, Email Correspondence, Flowers and Gifts delivery, translating services, and many more.

More than one thousand weddings have happened thanks to AnastasiaDate.com over the last two decades, so you really need to look no further to find the woman of your dreams.
